

Yuzu say goodbye to wasted goods

* based on 52 survey responses

The Problem

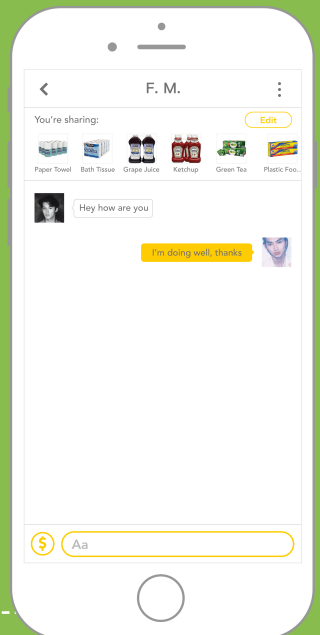

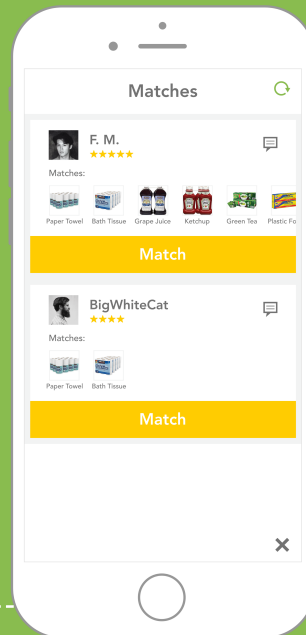

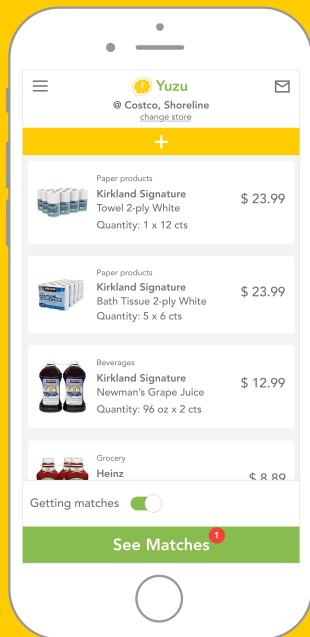

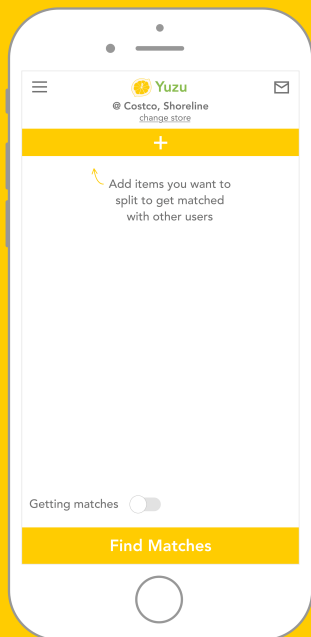

Wholesale stores provide quality items in affordable prices, but with items being sold in **large quantities**, they result in **waste of goods** and **higher total bill** setting people from saving money

The Research*

- 90%** of the survey respondents shop at wholesale stores due to lower cost per item
- 48%** of the survey respondents do NOT shop at wholesale stores due to bulk quantities
- 40%** of the survey respondents reported disposing of goods purchased in bulk quantities

The Solution

Find shoppers to split items with in real-time

Use Yuzu to find items you want to split with people and add them to the Yuzu list.

Turn on the matching feature to start finding Yuzu-ers to split items with. Yuzu will notify you when matches are found.

View matches to see what items have matched and who you matched with.

Reach out to your matched Yuzu-ers to confirm meet up time and location to split items.
